| **Pull Request or Patch supplied:** | No | **Resolution:** | not reproducable |
| **Crashes QGIS or corrupts data:** | No | **Copied to github as #:** | 26981 |

**Description**

I can't get any images out of the WMS service when the project's CRS is set to EPSG:31468 and I'm requesting images using the same CRS through the WMS. I've attached my simple test project containing only a single WMS layer as data source that is already served in EPSG:31468.

**History**

*- Status changed from Open to Feedback*

I cannot reproduce this (on Linux) with current master, can you please paste one example WMS call (URL) that fails?

**#2 - 2018-08-15 11:55 PM - Giovanni Manghi**

*- Resolution set to not reproducable*

*- Status changed from Feedback to Closed*

Closing for lack of feedback.
