

QGIS Application - Bug report #19164

Crash when switching user profiles (too early?)

2018-06-11 11:08 AM - Harrissou Santanna

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Project Loading/Saving	
Affected QGIS version:	3.1(master)	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch submitted:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 26993

Description

User Feedback

I did not do any particular thing: I opened QGIS with the wrong user profile and when I realized that, I went to Settings --> User profiles and select the one I wanted. No projet was launched.
Before that new instance opens, I asked to close the first one that I did not need. And kaboom
