Crashes QGIS or corrupts data:	No	Copied to github as #: 27027
Description		
It worked good in QGIS 3.0.3-Girona. Look at the attached screenshot (On the left QGIS 3.0.3, on the right QGIS 3.1.0): I opened the same project in both versions of QGIS. In QGIS 3.1.0-Master you can't see classes in legends for raster and vector layers.
