

QGIS Application - Bug report #19246

[identify] Identify selection tools do not work when "layer selection" mode is active

2018-06-22 01:28 PM - Harrissou Santanna

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Unknown	
<b>Affected QGIS version:</b>	3.1(master)	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 27074
<b>Description</b>		
<p>In the "Identify Results" panel, select the "Layer selection" as mode (at the bottom)</p> <p>Now select a tool like "Identify features by polygon"</p> <p>Click on the map and draw the selection polygon</p> <p>Nothing happens</p> <p>This only works if you use the "identify features by area or single click". Actually, with this tool, it works only if you do the single click. Not the area part.</p>
