

QGIS Application - Bug report #19249

The "effect neon" symbol breaks layer type and edit status icons in the Layers panel

2018-06-22 03:14 PM - Harrissou Santanna

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Map Legend	
Affected QGIS version:	3.1(master)	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 27077
Description		
<p>In the attached image, the New Scratch Layer2 is a line layer to whom I apply the default "effect Neon" line symbol. I would have expected it being more prominent (and not just show something like a point)</p> <p>Testing more: when in the layer properties dialog you set the symbol and apply, the Layers panel looks great until you close the properties dialog and select another layer.</p> <p>Also toggling the layer to edit does not show the pencil icon over the reduced geometry type icon.</p> <p>Occurs also in 3.0</p>
