This you used the standalone installer or the osgeo4w one? Did you had any previous version already installed?

#2 - 2009-09-12 01:16 AM - Jürgen Fischer

- Resolution set to worksforme

- Status changed from Open to Closed

Replying to [carfog81](#):

| (Could not start the application because the configuration is incorrect. Reinstalling the application may fix this problem)

Looks like you didn't install the VC++ redistributable package. See the download page:

| Note: You may need to install the Microsoft C Runtime Libraries too. If QGIS does not start, get the MSVC libs from [here](#) and install them before trying to run QGIS again.

Feel free to reopen installing that doesn't help

I used the standalone installer

I just installed the Microsoft C Runtime Libraries and show a new error

"qgis.exe Application error
the application could not be initialized correctly (0xxc0150002). Click OK to terminate the application"

I just installed Daphnis in Win XP2 and it is running perfectly. Some one knows if Daphnis doesn't run in Win XP SP3

#6 - 2009-09-16 04:19 AM - Giovanni Manghi

it works fine here with sp3, but I install only trough osego4w, not standalone.
