Category:	Map Canvas		
Affected QGIS version:	3.2	Regression?:	No

Crashes QGIS or corrupts data:	No	Copied to github as #:	27091
Description			
<p>When I use eg. EPSG 3031 on my project, and add a 4326 point layer and enables labeling, things looks fine until I apply a rotation to the map, which shifts the labels severely off the points, see attachment. (Maybe related to #16897, but occurs in regular Map View.) Affects both QGIS 3.2 and 2.18.4.</p>
