When exactly that crash happen? I assume it may be:

- a) When you just display the plugin details without clicking "install"
- b) As soon as you click "install"
- c) A few seconds after you click "install", i.e. after installing and during loading the plugin

#3 - 2018-08-16 10:28 AM - Giovanni Manghi

- *Resolution set to not reproducible*

- *Status changed from Feedback to Closed*

Closing for lack of feedback.
