

QGIS Application - Feature request #1927

Some possible improvements about row selection on attribute table

2009-09-11 08:31 PM - gcarrillo -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Data Provider	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 11987
Description		
<p>I think the row selection on attribute table can be improved in some ways:</p> <ol style="list-style-type: none">1. Dragging the vertical header should select multiple rows.2. The single click shouldn't toggle the row selection (for selected rows). Instead, it could be done using Ctrl+Click. <p>(Please look at the screencast [1] to find a visual explanation of 1. and 2.)</p> <ol style="list-style-type: none">3. The Ctrl and Shift keys should be captured even if they are pressed out of the attribute table window. (Currently this keys only work if they're pressed when the Table View has the focus) <p>[1] http://downloads.tuxfamily.org/tuxgis/tmp/att_table.zip</p>
