

QGIS Application - Bug report #19271

Crash on SQL queries - virtual layers

2018-06-26 04:30 PM - Bugmi Gnot

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	DB Manager	
Affected QGIS version:	3.2	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 27099
Description Steps to reproduce: <ul style="list-style-type: none">- New project- New temporary vector (name "asd", geometry: LineString)- Draw a line- Menu Database -> DB Manager, click on Virtual Layers -> QGIS layer -> asd, open the SQL window- Run query: "SELECT * FROM asd;", query should run OK- Run query: "SELECT geometry FROM asd;", query should run OK- Run query: "SELECT GLength(geometry) FROM asd;", query should run OK- Run query: "SELECT **", crash occurs- Run query: "SELECT geometry_n FROM asd;", crash occurs- Run query: "SELECT NoSuchFunction(geometry) FROM asd;", crash occurs See attached file for stack trace		

History

#1 - 2018-06-27 11:36 PM - Jürgen Fischer

- Subject changed from QGIS 3.2.0 - Crash on SQL queries to Crash on SQL queries

#2 - 2018-10-02 01:22 AM - Stephen Knox

I can't reproduce a crash on the queries flagged, although they don't work, but that isn't surprising since they don't seem to be valid SQL. Perhaps a close candidate as time has moved on?

#3 - 2018-10-02 10:21 AM - Giovanni Manghi

- Status changed from Open to Feedback

#4 - 2018-10-23 09:47 AM - Regis Haubourg

- Status changed from Feedback to Closed

- Resolution set to not reproducible

- Priority changed from High to Normal

Tested here with latest nightlies.

I get "database error" messages in a popup but no QGIS crash.

For sure the error message are not really informative but this would be more a feature request to improve that part of DBmanager (would be really nice to have verbose messages from spatialite / SQLITE)

Please reopen if the crash still occurs
