

QGIS Application - Bug report #19291

Only limited number of layers displayed with 3.2

2018-06-28 08:04 AM - Patrick Dunford

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	Map Canvas		
Affected QGIS version:	3.2	Regression?:	No
Operating System:	Debian 9	Easy fix?:	No
Pull Request or Patch supplied:	No	Resolution:	
Crashes QGIS or corrupts data:	No	Copied to github as #:	27119
Description			
<p>When my existing 3.0x projects are opened, not all of the layers can be displayed all at the same time. This is completely contrary to experience with 3.0 and all earlier editions.</p> <p>Sample data coming.</p>

- File config.bz2 added

It appears this is caused by issues with the config settings used in a previous 3.0 installation on the same machine. Attached config settings

I think this is not to do with the config

It is just <https://issues.qgis.org/issues/18322> coming up again
