QGIS Application - Bug report #19308
QGIS 3.2 Bonn can crash if you click refresh on a WMTS layer in the browser

2018-06-29 03:03 PM - Ian Turton

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Browser		
Affected QGIS version:	3.2	**Regression?:**	No
Operating System:	Linux astun-desktop 4.13.0-45-generic #50~16.04.1-Ubuntu SMP Wed May 30 11:18:27 UTC 2018 x86_64 x86_64 x86	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	not reproducable
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	27136

Description

No indication of what happened, just disappears. Other times it just refuses to fetch the new data from the server, which is very annoying if you have added a new layer or format.

I can add the contents of my capabilities if you like but I don't think there is anything important in that.
