Description

User Feedback

- 1) open the project (attached 7z archive)
- 2) select layer "due"
- 3) select feature with EntityHand = F5559
- 4) from processing toolbox select tool "Union" (native:union)
- 5) input layer = "uno", Output layer = "due" "Selected features only" ON, Create temporary layer, "Open output file after running algorithm" ON
- 6) press "Run in Background" and watch the app crash

I couldn't replicate this bug by drawing lines by hand, it had to be THIS combination of layers.
