

QGIS Application - Feature request #19340
making Groups in Symbology

2018-07-05 08:55 AM - A. Egberts

Status:	Open	Resolution: Copied to github as #: 27168
Priority:	Low	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>Hello,</p> <p>I was wondering if it could be possible to make groups, in the symbology tab?</p> <p>It is possible to sort the layer list by alphabeth, but I want to group some layers, that have a relation. So all road layers in 1 group, and all building layers in 1 group.</p> <p>Can this be take to a future Qgis version?</p> <p>(see jpg file)</p>
