

QGIS Application - Feature request #19375

hide legend classes

2018-07-10 08:35 AM - Gavin Fleming

Status:	Open	Resolution: Copied to github as #: 27203
Priority:	Normal

Category:	Symbology	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
I have a rule based classification where the symbol is the same but the filter and scale dependency are different across classes.		
When I do a GetLegendGraphic I get each class in the legend but I only want one (since each one is the same)		
A good way to achieve this might be a 'hide class' checkbox in each rule, or even 'hide in composer' and 'hide in GetLegendGraphic'
