

QGIS Application - Bug report #19392

Problem to open protocol Links GeoJSON

2018-07-11 03:12 PM - Jean-Louis Stanus

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Data Provider	
Affected QGIS version:	2.18.20	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 27220
Description		
When i try to open links as exemple : - https://raw.githubusercontent.com/geobabbler/geodata/master/geojson/leonardtown_bldgs.geojson - https://d2ad6b4ur7yvpq.cloudfront.net/naturalearth-3.3.0/ne_110m_admin_1_states_provinces_shp.geojson - https://www.nanaimo.ca/crimereporting/api/incidents.geojson it generates errors as seen on pictures. If the same service exists without <i>ssl/https</i> (so <i>http</i>), it can be opened without any problem. The problem is the same in 3.2 windows. OS : Windows 10 - 64 bits Versions : 2.18.21 / 3.2 Builds : OSGEO4w I tested on linux ubuntu 16.04 ppa build. All the links are opened without error. Additional informations : https://gis.stackexchange.com/questions/242559/error-when-add-geojson-protocol-layer-in-qgis?noredirect=1#comment463434_242559		

History

#1 - 2018-09-10 07:13 PM - joe larson

Guessing this is a duplicate of <https://issues.qgis.org/issues/17947>

#2 - 2018-09-10 08:30 PM - Giovanni Manghi

- Resolution set to duplicate

- Status changed from Open to Closed

Closing the older one as the newer has more details.
