

QGIS Application - Bug report #19407

QGIS hanging/freezing during extended periods of vector file editing/saving

2018-07-13 04:33 AM - Ben Walsh

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>	Ben Walsh	
<b>Category:</b>	Vectors	
<b>Affected QGIS version:</b>	2.14.2	<b>Regression?:</b> No
<b>Operating System:</b>	Windows 10	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> not reproducible
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 27235
<b>Description</b>		
<p>When editing vector files over extended periods, with multiple saves, the application starts to freeze when: saving edits and toggling edit mode. This seems to affect all three versions I use 2.14.22, 2.18 and version 3.</p> <p>It also consumes 30% of CPU while in hanging state. (i7 6700HQ)</p>

- Status changed from Open to Feedback

This is a symptom of a bad plugin. Try disabling all plugins and try again.

#2 - 2018-08-16 03:14 PM - Giovanni Manghi

- Resolution set to not reproducible

- Status changed from Feedback to Closed

Closing for lack of feedback.
