

QGIS Application - Bug report #19417

AttributeError: 'BatchInputSelectionPanel' object has no attribute 'getText'

2018-07-14 06:50 PM - Michel Gouédard

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Processing/GDAL	
Affected QGIS version:	3.2	Regression?: Yes
Operating System:	Windows 7 64bits SP1	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 27245
Description When trying to merge 2 Raster files in geotiff (from http://srtm.csi.cgiar.org/), - in Batch Process, - to each layer one line - no pseudo-color retrieving - no separate bands - Float32 output - load layers, I get an fatal error and the python log reads : WARNING Traceback (most recent call last): File "C:/PROGRA~1/QGIS3~1.2/apps/qgis/.python/plugins/processing/gui/BatchAlgorithmDialog.py", line 86, in accept parameters[param.name()] = wrapper.value() File "C:/PROGRA~1/QGIS3~1.2/apps/qgis/.python/plugins/processing/gui/wrappers.py", line 726, in value return self.widget.getText() AttributeError: 'BatchInputSelectionPanel' object has no attribute 'getText' It looks the same as [Bug report #17837 AttributeError: 'BatchInputSelectionPanel' object has no attribute 'getText'] which got closed as duplicate of [Bug report #17821 batchmode for gdal/translate do not work with actual master 2.99], which itself got closed as fixed by changeset qgis dc99b8b2f00d2b4be5ece684e8bd222890adb161. Hence I marked it as regression. Python-Version: 3.6.5 (v3.6.5:f59c0932b4, Mar 28 2018, 17:00:18) [MSC v.1900 64 bit (AMD64)] QGIS-Version: 3.2.0-Bonn, bc43194061
