| Affected QGIS version: | 3.2.1 | Regression?: | Yes |
| Operating System: | Linux Mint 19 Tara x86_64 | Easy fix?: | Yes |
| Pull Request or Patch supplied: | | Resolution: | fixed/implemented |
| Crashes QGIS or corrupts data: | | Copied to github as #: | 27312 |
| Description | | | |
| <p>This problem appeared again in v3.2.1. Fields with coordinates are added, in the labels are assigned. This problem appears in the new layers. If I copy the style configured in v3.2.0, then the move works.</p> <p>Checked on debian/stretch and ubuntu/bionic QGIS repositories.</p> | | | |

The problem is still present in QGIS 3.2.2.

#4 - 2018-12-27 09:46 AM - Nyall Dawson

- Status changed from Open to Closed

This is fixed in 3.4

#5 - 2018-12-28 03:10 PM - Giovanni Manghi

- Resolution set to fixed/implemented
