

QGIS Application - Bug report #19486

[Style Manager] Rename "select by group" into "select by category"

2018-07-25 06:23 PM - Harrissou Santanna

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Symbology	
Affected QGIS version:	3.3(master)	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 27314
Description		
<p>Open Style Manager dialo, press Import/export and select "Export symbols"</p> <p>At the bottom of the dialog, you have a "select by group" button.</p> <p>given that group concept no longer exists in the style manager and this button actually helps to select both by smart group or by tag or All. I propose to rename it "Select by category" because category is the wording we'll be using in the docs (underway) to name the left panel of the style manager dialog.</p> <p>Because this wording will widen the "Export symbols" dialog, in case it's an issue, I propose to combine both "select all" and "select by category" buttons in a single button menu.</p>
