

## QGIS Application - Bug report #19533

### QGIS browser panel scanning slows down QGIS

2018-08-02 01:28 PM - Saber Razmjooei

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Browser	
<b>Affected QGIS version:</b>	2.18.22	<b>Regression?:</b> No
<b>Operating System:</b>	Windows 7 - VDI	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 27360
<b>Description</b>  I am trying to browse to some folders containing 100s of layers (mainly Mapinfo tab files) through QGIS panel. The scanning takes a long time and slows down QGIS to almost an unusable state. Note that I am using QGIS on a VDI.  The work-around is to hide the folder from scanning.

Does it happen also on 3.\*?

**#2 - 2018-08-25 12:52 PM - Paolo Cavallini**

AFAIK this has always been so. Do you find previous versions faster?

**#3 - 2018-08-28 10:58 AM - Saber Razmjooei**

I have noticed it only under QGIS 2.18. It is specific to the VDI and works fine on the normal OS.

vdi = virtual machine?

**#6 - 2018-08-29 02:36 PM - Saber Razmjooei**

hi Gio, yes. Virtual Desktop Infrastructure. It is a common method these days within some large organisations.

- *Status changed from Open to Feedback*

Please test with QGIS 3.4 - QGIS 2.18 reached it's end of life.
