

QGIS Application - Bug report #19541

I do not see Utm Coordinates, they are Geographical.

2018-08-03 04:22 PM - ROMAN ADOLFO CARVAJAL

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Actions	
Affected QGIS version:	2.18.21	Regression?: No
Operating System:	WINDOWS 7	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 27368
Description		
<p>Hello, I am working with Qgis version 2.18.21 in windows 7. I have a layer with SRC 32618 ZONE UTM 18N. The properties are the same for the Project. in the coordinates box of the taskbar I see decimal geographical coordinates. I suppose if I have my project and my layer in UTM EPSG 32618, should not I be looking in this drawer UTM coordinates like those that Google Earth offers for this area. (391916.00 m E - 505833.90 m N) ?. What should I configure to get to see UTM in the Coordinate drawer?</p> <p>regards</p>

Hi,

questions are better asked on other channels, like mailing lists or gis.stackexchange.

Look in "project properties" > "coordinate display".
