QGIS Application - Bug report #1956
Sample data GPX file should be in WGS84

2009-09-29 01:25 AM - Niccolo Rigacci

Status:	Closed		
Priority:	Low		
Assignee:	Otto Dassau		
Category:	Documentation and Help		
Affected QGIS version:		**Regression?:**	No
Operating System:	All	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	12016

Description

As far I know, GPX files should use the WGS84 spatial reference system, as stated here:

http://www.topografix.com/GPX/1/1/#type_latitudeType

So I think that the qgis_sample_data/gps/national_monuments.gpx - which uses a different system - should be converted.

History

#1 - 2009-11-30 03:42 AM - Otto Dassau

- Resolution set to fixed

- Status changed from Open to Closed

changed waypoints to latlon WGS84 CRS and renamed the file to national_monuments_wgs84.gpx.
