

QGIS Application - Bug report #19563

Scaling issue on TOC layer style legend

2018-08-08 08:33 AM - Jakob Lanstorp

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Map Legend	
Affected QGIS version:	3.2.1	Regression?: No
Operating System:	Windows 0	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 27390
Description		
<p>Building a composite polygon vector style, could result in the style legend of TOC to be rendered as a white box due to scaling of the style to TOC legend size. See style here: [[https://gis.stackexchange.com/questions/291872/creating-a-brick-wall-style-for-polygons/291898#291898]]</p> <p>Using a point pattern fill half_square with dimensions larger than 4 mm, the style does not shrink to fit in legend.</p> <p>Attached is a polygon brick wall sample QML style file and a QGIS png screen dump showing style and TOC legend.</p>

- Status changed from Open to Feedback

I'm almost sure that this is duplicate of an already existing ticket.

#2 - 2018-08-08 01:05 PM - Jakob Lanstorp

I browsed the 143 issues recorded under the category Symbolology without finding a possibly duplicate issue - might have missed one through.....

#3 - 2018-08-23 07:06 PM - Giovanni Manghi

- Status changed from Feedback to Open

- Category changed from Symbolology to Map Legend
