

## QGIS Application - Bug report #19586

### Problem reading grib file

2018-08-10 09:55 AM - Saber Razmjooei

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>	Peter Petrik	
<b>Category:</b>	Data Provider/MDAL	
<b>Affected QGIS version:</b>	3.3(master)	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 27413
<b>Description</b>  This is a follow up from #17219  I can open the grib as raster, but as mesh layer, nothing shows up. Crayfish can read the file with no problem in 2.18.  <a href="http://www.faunalia.eu/~paolo/grib.zip">http://www.faunalia.eu/~paolo/grib.zip</a>

### History

#### #1 - 2018-08-10 09:55 AM - Saber Razmjooei

- Category changed from Data Provider to Data Provider/MDAL

#### #2 - 2018-08-10 09:56 AM - Saber Razmjooei

- Related to Feature request #17219: Better description of bands added

#### #3 - 2018-08-10 01:58 PM - Saber Razmjooei

In fact, I can't assign a CRS to my GRIB mesh layer. Even if I set it to EPSG:4326 under Properties, it keeps resetting it to Invalid Projection.

#### #4 - 2018-08-10 02:26 PM - Saber Razmjooei

- File *grib.png* added

OK...if I set the map canvas to EPSG:4326 things work:

#### #5 - 2018-08-10 02:30 PM - Saber Razmjooei

- Status changed from Open to Closed
