

QGIS Application - Bug report #19618

QGIS Crashed on clearing recent project

2018-08-14 02:49 AM - [?][?]

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Unknown	
Affected QGIS version:	3.2.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: no timely feedback
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 27445

Description

User Feedback

There was a conflict clearing the list of recently used projects.

Just I ran QGIS Desktop 3.2.1. And right click to remove the list of recently used projects and press remove from list. Then, I got this error.

#3 - 2018-08-14 11:31 AM - Giovanni Manghi

- Status changed from Feedback to Open

#4 - 2018-09-17 05:59 AM - Katie Urey

a similar crash.

System- Xenial

QGIS Version: QGIS - 3.3.0-Master 'Master' (d7fb5f9)

These are the actions to reproduce this error:

- Select a recent project from the gui-frame which shows recent projects.
- Select "Remove from List"

Also, when QGIS does not crash, and the "remove from List" selection has been made, on restarting QGIS, the project still shows in the recent projects

list.

Related, but possibly, another issue. QGIS did not report a new *.qgz file until I had opened, then closed the project (without leaving QGIS.) The *.qgz project appears in the graphical list of recent projects. Then, when closing and restarting QGIS, the *.qgz project is not listed.

Please let me know if I can help by providing specific information.

I report only to help test and am not involved in any productive project work.

=====

I seem to have set qgis up to echo trace information like this to the screen, but not to a file.

Warning: void DBusMenuExporterPrivate::fillLayoutItem(DBusMenuLayoutItem*, QMenu*, int, int, const QStringList&): No id for action
