Crashes QGIS or corrupts data:	No	Copied to github as #: 27469
Description		
Hi, when I try to use vector menu, its submenu doesn't appear. See the attached file		

History

#1 - 2018-08-19 11:03 AM - Giovanni Manghi

- Category changed from Vectors to GUI
- Resolution deleted (fixed/implemented)
- Regression? changed from Yes to No
- Pull Request or Patch supplied changed from Yes to No
- Priority changed from High to Normal
- Status changed from Open to Feedback

What about if you set the language to EN and then restart qgis?

do you have anything at all enabled (look in the plugin manager) that should show in the vector menu?

#4 - 2018-08-20 04:18 PM - Alessandro Pasotti

- Status changed from Feedback to Open

I don't see much more in master:

- + Vector
 - + GeoProcessing Tools
 - + Difference
 - + Intersection
 - + Symmetrical difference
 - + Union

There is actually something broken in the vector menu (at least in master)

Hi I solved the issue. I deleted the Qgis folder and I reinstalled the program. It seems that the problem derives from an "interference" between the old and new qgis installations.
Thank you
