

QGIS Application - Bug report #19644

can't view python error log because crash modal window overlap log window

2018-08-19 08:43 AM - len kong

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	3.2.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 27471
<b>Description</b>  I run a python plugin, unfortunately, it causes qgis app crash. wanna see the log messages, but the crashed window overlap it. It can't switch from the message tab to python error tab  is it bug ?, or is there a way to let me see the python error message  QGIS Info QGIS Version: 3.2.1-Bonn QGIS code revision: 1edf372fb8 Compiled against Qt: 5.9.2 Running against Qt: 5.9.2 Compiled against GDAL: 2.2.4 Running against GDAL: 2.2.4

- Resolution set to invalid
- Status changed from Open to Closed

If you run debugview (<https://docs.microsoft.com/en-us/sysinternals/downloads/debugview>) the python error will be logged to the debug window.
