

QGIS Application - Bug report #19646
Atlas with HTML text box causing crashes

2018-08-20 12:45 AM - Barrett Higman

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	3.2.1	Regression?: Yes
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: no timely feedback
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 27473

Description

User Feedback

QGIS crashes when I try to preview my atlas. It seemed to be working fine until I added a text box with html that displays an image. The html used is the following:

```

```

The workspace worked ok, even with the html text box, until I closed the workspace and then reopened it. Since then it crashes every time I try to preview the atlas. If I delete the text box then the preview works fine.
