<b>Description</b>		
<p>The classes Triangulation and DualEdgeTriangulation are currently «Not available in Python bindings».</p> <p>Will they be available in a future release of QGIS?</p> <p>In python it's possible to build Delaunay triangles with QgsGeometry.delaunayTriangulation(), but then I need to find for each point in which triangle it is, as does the Triangulation.getTriangle() function. Thanks.</p>
