

## QGIS Application - Bug report #19666

### Can't Select Shape File Polygon in New Project

2018-08-22 12:23 AM - Damien Smith

<b>Status:</b>	Closed	
<b>Priority:</b>	High	
<b>Assignee:</b>		
<b>Category:</b>	Map Canvas	
<b>Affected QGIS version:</b>	3.2.2	<b>Regression?:</b> Yes
<b>Operating System:</b>	Windows 10 x64	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 27491
<b>Description</b>  In 3.2.2 if I create a new project and add a polygon shp file, I can't select or identify objects. I get a "No active Vector Layer" error when I try to select objects. I've tried selecting the layer and even making it editable but I still can't select anything. If I open an old project, everything is fine. This issue does not occur in 3.2.1.

If you save the current project and then reopen it, selecting works fine.

##### #2 - 2018-08-22 02:39 AM - Nyall Dawson

- Resolution set to fixed/implemented
- Status changed from Open to Closed

Fixed in master
