QGIS Application - Bug report #19680
Styles saved in a Spatialite DB are then not available to be used

2018-08-23 07:51 PM - Giovanni Manghi

Status:	Closed			
Priority:	High			
Assignee:	Alessandro Pasotti			
Category:	Symbology			
Affected QGIS version:	3.3(master)	**Regression?:**	Yes	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	Yes	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	27505	

Description

Tested on master/linux.

import a layer (say both of the same type of geometry) into a SL db

add to the canvas one of them, create a symbology, save it to the SL DB as default

try add again the same layer to the project, the default style is not loaded

try load the style manually from style > load style > database styles manager, the style just saved does not show

There are actually two bug or three bugs here, one unreported is fixed with:
https://github.com/qgis/QGIS/pull/7925

The last one "the style just saved does not show" is also fixed (PR on the way).

For the second one I'm working on it but looks like it was disabled about one year ago with commit:ba62ffce2c7fa6f6331e33f751e4a901a26e8e45 , that may not be the only reason though.

#3 - 2018-09-17 12:42 PM - Alessandro Pasotti

- Status changed from Open to In Progress

#4 - 2018-09-17 01:07 PM - Alessandro Pasotti

- Pull Request or Patch supplied changed from No to Yes

All fixed in https://github.com/qgis/QGIS/pull/7926
