QGIS Application - Bug report #1971
print composer crashes when adding image path

2009-10-03 12:11 AM - Paolo Cavallini

Status:	Closed			
Priority:	Low			
Assignee:	Marco Hugentobler			
Category:				
Affected QGIS version:		**Regression?:**	No	
Operating System:	Debian	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	12031	

Description

If I add an image to a map composer, the icon remains pressed, and nothing happens until I click on the page. If I try to add a directory of images (containing also othe files, QGIS crashes:

Warning: Cannot read file '/home/paolo/Desktop/Dati/vari/fagiani.csv', because: Start tag expected. (line 1)
Warning: Cannot read file '/home/paolo/Desktop/Dati/vari/Faunalia.png', because: Encountered incorrectly encoded content. (line 1)
Warning: Cannot read file '/home/paolo/Desktop/Dati/vari/fix.txt', because: Start tag expected. (line 1)
Warning: Cannot read file '/home/paolo/Desktop/Dati/vari/fix_shape.dbf', because: Encountered incorrectly encoded content. (line 1)
Warning: Cannot read file '/home/paolo/Desktop/Dati/vari/fix_shape.shp', because: Encountered incorrectly encoded content. (line 1)
Warning: Cannot read file '/home/paolo/Desktop/Dati/vari/fix_shape.shx', because: Encountered incorrectly encoded content. (line 1)
Segmentation fault

History

#1 - 2009-10-03 12:16 AM - Paolo Cavallini

Furthermore, adding a valid path does not persiste across images (if I add a second image, I have to add my path again)

#2 - 2009-10-07 05:52 AM - Marco Hugentobler

> *If I add an image to a map composer, the icon remains pressed, and nothing happens until I click on the page*

Yes, this is the same behaviour as with the other tools (add scalebar, legend, composer map, label).

> *If I try to add a directory of images (containing also othe files, QGIS crashes:*

Hm, this does not happen for me here (also if other files are in the directory). Maybe it only happens with certain types of file? The composer uses two qt classes (QSvgRenderer and QImageReader) to test if the files are valid as composer pictures

> *Furthermore, adding a valid path does not persiste across images (if I add a second image, I >have to add my path again)*

But if you press the file selection button, the path should be stored for the file dialog

#3 - 2009-10-10 12:49 AM - Giovanni Manghi

All replicable here, on qgis 1.3 from repository and Ubuntu 9.04.

#4 - 2009-11-29 05:33 AM - Giovanni Manghi

- Resolution set to fixed

- Status changed from Open to Closed

I believe that all this issues are gone already. Just tested trunk under both linux and windows xp. Please reopen if necessary.
