Description

It would be great to have a map legend reflect a map theme in the same way that the map itself does in a print layout/ report.

I am trying to set up a report in QGIS 3.2 to export a whole series of maps. At the moment, I cannot alter the style of the legend (we have different styles for the one layer depending on the map requirements) without manually changing the style/ map theme in the map viewer window. This effectively means that I have to manually export the series of maps.

Thanks.
