

QGIS Application - Bug report #19737

map_layers variable does not return layer names

2018-08-30 04:27 PM - Harrissou Santanna

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Expressions	
Affected QGIS version:	3.3(master)	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 27562
Description		
<p>Select a map item in the layout</p> <p>Scroll to the variables frame in the item properties and check the map_layers variable; it shows `[<map_layer>, <map_layer>,&...]`. I'd have expected to see layer names instead. Checking this variable in the expression dialog of a property of the map item also displays the same output (at the bottom of the dialog)</p>

Those are layer values though, not strings

#2 - 2018-08-31 03:01 PM - Harrissou Santanna

Ah, right. Not sure what would then be the "fix". Should we close this?

#3 - 2018-08-31 10:38 PM - Nyal Dawson

- Status changed from Open to Closed

I think so.

#4 - 2018-09-02 04:54 PM - Giovanni Manghi

- Resolution set to invalid
