QGIS Application - Bug report #19770
Path length limit on file open dialog box

2018-09-04 07:10 PM - Patrick Dunford

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	Data Source Manager		
Affected QGIS version:	3.2.2	**Regression?:**	No
Operating System:	Debian 9.5	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	27595

Description

When opening multiple raster layers

The last filename and a few that followed it were truncated

e.g.

"/mnt/share/mainpc/maps/Non-Rail/Christchurch/1lds/94CLL-92

which should have been

"/mnt/share/mainpc/maps/Non-Rail/Christchurch/1lds/94CLL-92XDP.jpg" and about another 60 files in a set of 540 rasters. Only the first 480 were imported.

This suggests to me there is a path length limit of about 32767 characters on this dialog box.
