

## QGIS Server 3 / WMS: the SLD parameter support has been removed

<b>Status:</b>	Closed	
<b>Priority:</b>	High	
<b>Assignee:</b>		
<b>Category:</b>	QGIS Server	
<b>Affected QGIS version:</b>	3.0.0	<b>Regression?:</b> Yes
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	Yes	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 27620

With the suppression of the class QgsHttpTransaction, the support of SLD parameter has been removed.

```
// SLD
QString value = parameters.value( QStringLiteral( "SLD" ) );
if ( !value.isEmpty() )
{
    QgsMessageLog::logMessage( QStringLiteral( "http and ftp methods not supported with Qt5." ) );
}
```

Also, the stroke width functions don't function for points and linestrings (only for polygon) although the request goes ok to the server.

You can also replicate under Desktop by:

- export a point sld file with a specific stroke-width (30 pixels for example)
- looking at the sld file the stroke width gets exported

```
<se:SvgParameter name="stroke-width">30</se:SvgParameter>
```

- importing the sld file ignores the stroke-width to the default (PROBLEM)

Hi Tudor Bărăscu,

Is there an open issue for your comment ?

Is there some tests in QGIS about SLD support ?

Hi René,

Somehow I didn't notice your reply.

Couldn't find any tests or any open issue regarding this.

The server tests are relatively easy to write.. but I cannot add the exact output image as the stroke-width is ignored and I don't know how to capture the exact image (I haven't tried) from Desktop.

I'll try and see if I can output with QGIS Server 2 and create a pull request.

All the best,

Tudor

Pull request with SLD import fix + test at <https://github.com/qgis/QGIS/pull/7961>

The server now outputs correctly for Point and Polygon but for line SLD's it outputs nothing.

I'll try and replicate in a test with the help of the 2.18 server.

What's the situation with current master?

this is merged and therefore I assume is fixed, please reopen if necessary.
