Description

When running QGIS 3.2 (and QGIS 3.3) with Danish translation, the link to the user manual is to a danish version of the user manual - but this does not exists.

This might be the same for other languages where the user manual is not translated.

As a consequence, when the user wants help - the browser opens with a url pointing to a danish version of the user manual (https://docs.qgis.org/testing/da/docs/user_manual/index.html) which does not exists.

Resolution:
If a translated version of the user manual does not exists: Change the url from https://docs.qgis.org/testing/da/docs/user_manual/index.html to https://docs.qgis.org/testing/en/docs/user_manual/index.html

Tested on QGIS 3.2.2 and QGIS 3.3.0-64

Afaict, works fine when using French language: the redirection to English is done. Richard might know better.

- Resolution set to fixed/implemented

Yes, only LTR is translated, so requests going to master for translations should just go to english.

We do this by redirecting apache. I'll have to look into the configuration.

Ok, fixed for da too..

I have checked with the new nightly build and it works perfect.

Thanks for fixing this!
