

QGIS Application - Bug report #19817

[Processing] The [optional] tag is not displayed for string parameters

2018-09-11 02:31 AM - Harrissou Santanna

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Processing/GUI	
Affected QGIS version:	3.3(master)	Regression?: Yes
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 27641
Description		
<p>When filling the "Join attributes by field value" algorithm dialog, you can ignore the "Join field prefix", in which case redundant fields are automatically suffixed. I think that this parameter should then appear as optional in the GUI.</p> <p>I guess it should be the same for the other "join attributes" algorithms</p>

Agreed! Will you make a PR?

#2 - 2018-09-11 12:18 PM - Harrissou Santanna

From what I can see, the "optional" argument seems already set for the parameter. See:

<https://github.com/qgis/QGIS/blob/0d200623b1944c66fdb7f6f303adbc6c20fcc2e/src/analysis/processing/qgsalgorithmjoinbyattribute.cpp#L76> or

<https://github.com/qgis/QGIS/blob/master/python/plugins/processing/algs/qgis/SpatialJoin.py#L124>

Looks like the issue is elsewhere and this is beyond my skills...

#3 - 2018-09-12 12:27 PM - Harrissou Santanna

I think this is a more general issue as some string parameters we described as [Optional in the docs](#) no longer appear as such in the application though still [coded as optional](#).

#4 - 2018-09-12 01:16 PM - Harrissou Santanna

- Priority changed from Normal to High

- Regression? changed from No to Yes

- Subject changed from "Join field prefix" in the "Join attributes by field value" should be optional (?) to [Processing] The [optional] tag is not displayed for string parameters

Found many other examples. Flags it as a regression.
