Affected QGIS version:	3.3(master)	**Regression?:**	No	
Operating System:	Windows 10	**Easy fix?:**	No	
Pull Request or Patch supplied:	Yes	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	27648	

Description

Hi !

Modifications to project models are not saved.

Steps to reproduce :

1. Create a model
2. Save it to the project (using the dedicated button)
3. Close.
4. Open the model (right-click, edit model)
5. Make some changes
6. Save it to the project again (using the dedicated button)
7. Close
8. Reopen the model

The modifications were not saved.

Expected results :

The model should be overwritten, opt. with a confirmation dialog.

Workarounds :

Manually delete the previous model before saving or save under another name.

Thanks for that models in project feature which will be very useful !!

Revision 340631f8 - 2018-09-15 06:53 AM - Olivier Dalang

fix #19824 where modifications to project models were not saved

Models definitions are now stored in a dict rather than list

which allows for less verbose code to reference models by name
