```

```
                              'test_project_values.qgz')
```

Would have expected to get as a response the values from the array:

```
*****
```

```
Content-Type: text/xml; charset=utf-8
```

```
<GetFeatureInfoResponse>
```

```
...
```

```
<Feature id="1">
```

```
<Attribute value="1" name="id"/>
```

```
<Attribute value="Id no. 1 value, Id no. 2 value, Id número 3 value" name="location"/>
```

...

but the server outputs:

...

```
<Feature id="1">
```

```
<Attribute value="1" name="id"/>
```

```
<Attribute value=""/>
```

...
