

QGIS Application - Bug report #19890

Crashes in 3D view while changing the view angle

2018-09-19 03:29 PM - Abhishek Kumar

Status:	Closed	
Priority:	High	
Assignee:		
Category:	3D	
Affected QGIS version:	3.2.2	Regression?: No
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 27714

Description

User Feedback

When I go to the 3D view and set the configure options in there. It runs fine until I change the view from top-view. After changing the view its not certain when will it crash. Sometime immediately, sometime its works very fine for sometime. I'm able to change the view, zoom in/out, rotate, etc. Then it suddenly crashes while loading tiles. Sometime it loads more than 150 tile successfully, other times it crashes in less than 10. Every time it happens while changing the view and but is uncertain when (mostly under 30 seconds to 1 min)
