Description

Why is there no "Annotation tool" entry (for Text/Form/HTML/SVG) in (default) menu, e.g. "Layer"?

That should be IMO menu accessible like the Measure tool or like Editing.

This seems to be one of the fiew functions which are not in menu and only accessible through the toolbar.

And speaking of usability, I'm suggesting that the input/cursor focus of the modal dialog "Annotation" should be on the text input (and not on the font properties like now).
