

QGIS Application - Bug report #19934

QGIS 3.2 processing scripts not updated when saved / crash when trying processing options > ok

2018-09-24 04:06 PM - Jochen Schwarze

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Processing/Core	
Affected QGIS version:	3.2.3	Regression?: No
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 27757
Description		
When editing processing scripts in QGIS 3 with right click > Edit script... in the processing toolbox, save it and then try to execute it by double clicking it in the processing toolbox, the script version that was loaded at QGIS start is executed, not the one just edited. The only (painful!) way to execute my edited script is to restart QGIS 3 any time an edit is made. Deleting the <i>pycache</i> folder under ...processing/scripts/ seem to have no effect. Sometimes opening the processing options and pressing OK has the desired effect (cp. answer to [[https://gis.stackexchange.com/questions/296665/update-processing-scripts-in-qgis-3]]), but in most cases when trying this QGIS crashes. Report below. Report Details Crash ID: 5e3a31012f28a3770f1edf75538b93b6036ced53 Stack Trace <pre>QgsMapRendererCustomPainterJob::waitForFinishedWithEventLoop : QgsMapRendererJob::errors : QgsMapCanvas::rendererJobFinished : QMetaObject::activate : QgsMapRendererParallelJob::renderLayersFinished : QgsMapRendererParallelJob::cancel : QgsMapRendererParallelJob::~QgsMapRendererParallelJob : QgsMapCanvasSnappingUtils::~QgsMapCanvasSnappingUtils : QObject::event : QApplicationPrivate::notify_helper : QApplication::notify : QgsApplication::notify : QCoreApplication::notifyInternal2 : QCoreApplicationPrivate::sendPostedEvents : qt_plugin_query_metadata : QEventDispatcherWin32::processEvents : CallWindowProcW : DispatchMessageW : QEventDispatcherWin32::processEvents : qt_plugin_query_metadata : QEventLoop::exec : QCoreApplication::exec : main :</pre>

[processing] Reload scripts after a script has been saved in the editor

Fixes #19934

History

#1 - 2018-09-28 07:26 AM - Nyal Dawson

I suspect the crash reported here has already been fixed -- it was likely a crash caused by having a processing algorithm dialog open when the options window was opened.

But the issue regarding the scripts not updating remains.
