

QGIS Application - Bug report #19966

Cyrillic symbols in QGIS Server

2018-09-27 11:32 AM - Alexander Novikov

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	QGIS Server	
Affected QGIS version:	3.2.3	Regression?: No
Operating System:	Windows Server 2016	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 27788
Description I have a project with Cyrillic attributes and label values. It works perfect in QGIS Desktop. But it seems not working in QGIS Server. There are empty squares instead letters in labels. Rule-based labeling also doesn't work. I've already tried what I could. I've changed system encoding, I've changed encoding in Apache config. Nothing helps me.

Try setting QT_QPA_FONTDIR env var to a folder that contains your fonts, for instance: /usr/share/fonts/truetype/

Unfortunately it doesn't help me.

I should add that latin symbols work perfectly. My server is run under Windows Server 2016.

#4 - 2018-10-06 10:12 AM - Alessandro Pasotti

- Operating System set to Windows Server 2016
