

QGIS Application - Bug report #19980

Copy and pasting part of style with geometry error

2018-09-29 09:40 AM - Saber Razmjooei

Status:	Closed	
Priority:	Normal	
Assignee:	Denis Rouzaud	
Category:	Symbology	
Affected QGIS version:	3.3(master)	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 27802
Description		
<p>With the new addition to copy and paste part of style by Denis, it always gives an error of geometry mismatch between source and target layers.</p> <p>IMO, the validation needs to be done on every component. As an example: you might want to copy Form style from a point layer and paste it to a line layer with identical fields. Currently, it comes up with geometry error. But instead, it should check the attribute columns and if they are identical, there should not be an issue with pasting it to the target layer.</p>		

History
