

QGIS Application - Feature request #20130

Identify tool does not work on mesh layer

2018-10-17 10:47 AM - Michel Kuhlmann

Status:	Closed	
Priority:	Normal	
Assignee:	Peter Petrik	
Category:	Map Tools	
Pull Request or Patch supplied:	Yes	Resolution: fixed/implemented
Easy fix?:	No	Copied to github as #: 27951
Description In the crayfish plugin 2 the elevation of the mesh at the current cursor position (hover over) was shown in the crayfish panel. It would be great, if this functionality would also be accessible in QGIS 3 either through Value-tool-Plugin, Identify Results or within Crayfish GUI.		

History

#1 - 2018-10-19 11:43 AM - Saber Razmjooei

- Tracker changed from Feature request to Bug report
- Regression? set to No
- Crashes QGIS or corrupts data set to No
- Affected QGIS version set to 3.3(master)
- Category changed from GUI to Map Tools
- Subject changed from Show elevation of mesh at cursor position to [mdal] Identify tool does not work on mesh layer

Let's change it to a bug so that someone will fix it ;)
