QGIS Application - Bug report #20138
"Show selected features" attribute table behavior doesn't work

2018-10-17 05:18 PM - Matthew Jurewicz

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Attribute table		
Affected QGIS version:	3.2.3	**Regression?:**	No
Operating System:	Windows 10	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	not reproducable
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	27959

Description

Settings > Options > "Data Sources" > "Attribute table behavior" > "Show selected features" does not affect map layer attribute tables (they always show all features). This is a problem when a layer has lots of features since the attribute table loads very slowly.

History

- Status changed from Open to Feedback

works as expected here on qgis/master on linux.

#2 - 2018-10-17 05:23 PM - Alessandro Pasotti

I can confirm: on master it works just fine, can you please test the latest builds?

#3 - 2018-10-17 05:39 PM - Jeffrey Bostoen

I also noticed this before earlier on, then I was recommended to use Shift + F6, which worked like expected.

#4 - 2018-10-17 09:22 PM - Matthew Jurewicz

Shift + F6 is a good work-around. The issue doesn't seem to be fixed in the latest nightly dev build. Please read description since I think we're talking about two separate things.

it works fine here, maybe is data related? what datasource are you using?

#6 - 2018-10-18 06:45 PM - Matthew Jurewicz

- File Capture.PNG added

I'm using a PostGIS layer. I've attached a screenshot of my setting.

I guess it should be cancelled, assuming I'm mistaken. Shift + F6 works fine for me.
