

QGIS Application - Bug report #2016

PgQuery 0.1.1 : output schema not took into account

2009-10-16 06:48 AM - aec -

Status:	Closed	
Priority:	Low	
Assignee:	Borys Jurgiel	
Category:	Python plugins	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: invalid
Crashes QGIS or corrupts data:		Copied to github as #: 12076
Description		
In english:		
In [[PgQuery]] for QGIS version 0.1.1, when the "temporary" table is created, it is created in the "public" schema whatever "output schema" is filled. This table is however loaded thereafter with the "good" specified schema. Table creation should take UI "output schema" into account ! Thanks.		
--		
In French:		
Dans [[PgQuery]] for QGIS version 0.1.1, lorsque la table "temporaire" est créée, elle l'est dans le schéma public quel que soit le "output schema" indiqué. Par contre le programme tente bien de la lire dans le schéma spécifié. La création de table doit prendre en compte "l'output schema". Merci !
