Description

Hi,

When porting a Qgis plugin from qgis2 to 3 using https://qgis.org/api/api_break.html I found some errors in the renamed v3 classnames, namely:

- `QgsStrategy` -> ~~`QgsNetworkStrategy`~~
 `QgsDistanceStrategy` -> `QgsNetworkDistanceStrategy`

Can you be more specific on what should be the changes, please? Or if you can provide the changes, source is at

https://github.com/qgis/QGIS/blob/master/doc/api_break.dox

Thanks
